About

Hi, my name is Like Zheng. Throughout my 5-year career, I have spent the first 3 years as a software engineer and the latter 2 years primarily working as a product manager, with a decent understanding of UI design. In my spare time, I enjoy writing code and experimenting with new technologies. My expertise leans more towards front-end development as opposed to back-end, and I have a strong focus on user experience, which is why I've taken up learning about product design and UI design. I value teamwork and have successfully built a 6-member front-end team from scratch, fostering an agile culture along the way.

Experience

// GreaterHeat Ltd.

Aug 2022 - Present

Product & Community Manager

Remote

After the successful expansion of the company to Singapore, I shifted my focus to product and community management to improve the company's community influence, which included communicating with the Filecoin community and designing product prototypes.

- Designed and developed a Filecoin Sealing-as-a-Service platform.
- Published a weekly newsletter about Filecoin and IPFS within the company with over 100 views. Newsletter was issued for 9 weeks as of this resume update.

// ByteArk Tech Ltd.

Aug 2021 - Jul 2022
