About

Hi, my name is Like Zheng. Throughout my 5-year career, I have spent the first 3 years as a software engineer and the latter 2 years primarily working as a product manager, with a decent understanding of UI design. In my spare time, I enjoy writing code and experimenting with new technologies. My expertise leans more towards front-end development as opposed to back-end, and I have a strong focus on user experience, which is why I've taken up learning about product design and UI design. I value teamwork and have successfully built a 6-member front-end team from scratch, fostering an agile culture along the way.

Experience

// ByteArk Tech Ltd.

Aug 2022 - Present

Community & Product Manager

Remote

Manage and compile information from the Filecoin community, as well as engage in the design of applications based on Filecoin.

- Designed and took part in the development of a Filecoin remote sealing (Sealing-as-a-Service) platform.
- Publish the internal Filecoin Weekly newsletter, which covers topics such as Filecoin-related news, events, code updates, articles, and videos. Successfully released 10 issues, accumulating views of over 200.

// ByteArk Tech Ltd.

Aug 2021 - Jul 2022
