About

Hi, my name is Like Zheng. Throughout my 5-year career, I have spent the first 3 years as a software engineer and the latter 2 years primarily working as a product manager, with a decent understanding of UI design. In my spare time, I enjoy writing code and experimenting with new technologies. My expertise leans more towards front-end development as opposed to back-end, and I have a strong focus on user experience, which is why I've taken up learning about product design and UI design. I value teamwork and have successfully built a 6-member front-end team from scratch, fostering an agile culture along the way.

Experience

GreaterHeat Ltd.
Product & Community Manager

Aug 2022 - Present
Remote

After the successful expansion of the company to Singapore, I shifted my focus to product and community management to improve the company's community influence, which included communicating with the Filecoin community and designing product prototypes.

- Designed and developed a Filecoin Sealing-as-a-Service platform.
- Published a weekly newsletter about Filecoin and IPFS within the company with over 100 views. Newsletter was issued for 9 weeks as of this resume update.

ByteArk Tech Ltd.
Product Manager

Aug 2021 - Jul 2022
Hangzhou, China

Led a team focused on developing applications based on Filecoin and IPFS.

- Managed a team of 5 people, including 2 Front-End Developers, 2 Back-End Developers, and 1 UI designer.
- Build a cloud storage application based on Filecoin and IPFS.

Muri Tech Ltd.
Front-End Leader

Mar 2021 - Jul 2021
Hangzhou, China

Started as a Senior Front-End Engineer and established Git usage guidelines and a design system. Successfully contributed to the team, leading to early regularization and promotion to Front-End Leader.

- Led a team of 8 developers to develop and maintain web applications.
- Refactored codebase to improve code quality, reduce technical debt, and increase site performance by 30%.
- Established Git usage guidelines based on trunk-based development.
- Developed the company's design system.

ByteArk Tech Ltd.
Front-End Leader

Feb 2019 - Feb 2021
Hangzhou, China

Started as a Front-End Engineer and was promoted to Front-End Leader upon successful completion of the probation period. Spearheaded the establishment of the Front-End team, developing the team's

development processes and standards.

- Managed a team of 8 developers to develop web applications, mobile apps, and WeChat mini-programs.
- Established the team's development processes and standards, including Git usage guidelines, code review guidelines, and design system.
- Researched Agile development methodologies, implemented best practices to improve team performance, and produced over 10,000 words of documentation.

Ningbo Port Information and Communication Ltd.
Aug 2018 - Jan 2019

Front-end Developer
Ningbo, China

Efficiently developed and meticulously maintained a website for port declaration system using Java and ExtJS.

- Improved developer experience by incorporating polyfills for IE11, increasing browser compatibility and enhancing functionality.

Projects

Pandarua
